

It has been increasingly galling for a true American to watch over recent years the increasing stranglehold the media giants have put on the airwaves, specifically the radio airwaves. One of the biggest factors that created the need for Satellite Radio (one of the BEST things to happen to this country in a long time, in case you're wondering) is the fact that, basically, TWO companies own commercial radio. That these Goliaths have the crust to try to bully -- with the complicity of supposedly impartial lawmakers -- the very people who have come along to rescue our ears from the -- forgive me -- crap they've forced on our ears over the last 20 years is beyond the pale. DO NOT SUPPORT NAB'S PETITION 04-160!!! For God's sake, it's like making David hand over his sling.
